FRIDAY MAY 25th, 1934

Number 11.

Welcome Home Party Is Well Attended

One of the best crowds ever attended a welcome home party on Friday night last in honor of Elders Isaac Roberts & Boothie Carl, recently returned missionaries of the Raymond First Ward. Roy Stone was Chairman of the evening, and everyone present had a most enjoyable evening.

A street meeting by the Broadway Store preceded the party in the Opera House, and a good crowd gathered there to hear the missionaries. Boothie Carl took charge and both of them spoke.

At 9 p.m. the programme commenced in the Opera House and the following numbers which took a little over an hour, were given:

The Public School Chorus sang one of their Contest Songs Reading—Teddy Brewerton. Trio—The Bennett Sisters Reading—Lily Anderson.

Elder Roberts spoke, and related many missionary experiences, some of them humorous, and some of them the experiences that make a missionary.

Mr. and Mrs. I. B. Roberts both spoke, and expressed their joy and pride at having their son home again after a successful mission.

Elder Carl related some of his experiences and thanked the people here at home for their faith and prayers in his behalf while he was away, and was glad to be home again with family and friends.

Mr. and Mrs. S. B. Card both expressed their pleasure in having their boy at home again after a successful and profitable mission.

Vocal Solo—Billy Mehew. Remarks—Bishop Allen, in which he expressed the joy and satisfaction of the ward in having these two splendid missionaries home, and hoped they kept on and kept busy in the work, for labor was badly needed at home.

Quartet—F. R. Taylor and Co.

Refreshments of cake and ice cream were then served, after which the crowd enjoyed itself in dancing until midnight, and all declared it a very enjoyable evening.

News Notes

L. D King left Monday on a short business trip to Calgary.

Lee Brewerton was in Lethbridge on Thursday last.

Red Distillate has a reputation for power and lasting qualities. Get a drum and try it. D. A. Watson.

The weather was cold and cloudy most of the day Monday but no rain fell although every one was praying hard that it would. Rain is the need of the hour right now and would be welcomed by everyone.

"The FIRESIDE PHILOSOPHER"

By ALFRED BIGGS

Truth needs no alibi.
Success cannot be measured in money.
Go against nature and it will get you.
Think straight and you'll go straight.
Common honesty is uncommon in politics.
Watch the man who talks of his honor.
A silent fool often gets credit for wisdom.
Flee from your shirt than your pocket.

News Notes

Gordon Brewerton of Cardston was a Raymond visitor on Sunday last.

Mr and Mrs S. I. May were Magrath visitors on Monday last.

J. G. Snow and O. H. Turner were in Lethbridge on business last Tuesday.

See Ellsworth Scoville for your Toronto Star each week. Plenty of good reading and all the comics.

Matrimonial Murmur with tis seake you made, Darling?

"No, dear, it must be your taste. The Cook Book says it's delicious."

The ball team played an exhibition game with Magrath Monday night at the Garden City, our boys losing by a 5-4 score. It grew almost dark before the game was finished and errors were frequent.

Mr. and Mrs. Adam Gedlaman spent Sunday here with their daughter and son in law Mr. and Mrs. Harold Garner and family. Adam burned out a connecting rod on the way down Sunday, and was forced to remain until noon Monday before he could get repairs made and leave for home again.

A \$10,000,000 fire in the Stockyards at Chicago, Sunday and Monday destroyed one square mile of houses, sheds and corals, and was described as the worst fire the city has had since 1871. Reconstruction will be commenced just as soon as the ground can be cleared of the debris. Investigators are seeking the cause of the fire, although it is believed a careless tossed cigarette started the disastrous blaze. One body was found in the ruins and 1,100 were injured, but only about a dozen of them seriously.

Funeral Services for Della Lybbert

Funeral services over the remains of Della, four year old daughter of Mr. and Mrs. Chas. Lybbert, were held in the Stake House grounds Friday afternoon at 2 p.m. Because of the nature of the illness it was deemed best to meet in the open air.

Bishop H. F. Allen of the Raymond First Ward had charge of the services, and Mr. McBride led the singing.

The speakers were Pres O. H. Snow and Elder Jus. S. Anderson, who both spoke comfort and consolation to the parents in their sorrow, and explained the beauties of the Resurrection in plainness.

A large crowd was present at the services, and a goodly number of cars followed the remains to the cemetery where interment was made. There was also a nice array of flowers for the occasion.

The sympathy of the community goes out to the loving parents in their deep sorrow. Little Della was playing one morning at ten a.m. when she was taken with a convulsion and lapsed into unconsciousness from which she never rallied. She was taken to the Hospital in the afternoon, and it was possible was done for her, but she passed away in the early hours of Thursday morning.

Raymond Men In Truck Accident

While returning from Calgary about 1 a.m. Sunday morning, Wm. Christensen and Stanley Cook had a tip over with the big truck of Ern, Nilsson's and were found shortly after by a car load of Magrath people on their way home from an evening in Lethbridge.

The boys had taken four of Meeks Bros. horses to Calgary for the Spring Race Meet and had loaded back with steel for the Canadian Sugar Factories, having travelled practically all night Friday, with but little sleep. They had left Lethbridge and arrived within about a mile of the Hutterite Colony on the north side of the Pot Hole, with Stan Cook driving when the accident occurred.

The truck was over to the left-hand side of the road, and in a moment of extreme drowsiness, while Bill was asleep, the vehicle ran down into the bar pit, hit the bank, and tipped

completely over, landing on its cab, and then turned about a quarter way around, on its cab before it stopped. The truck was damaged but slightly.

Stanley Cook had his leg fractured and badly wrenched, and had to be taken to the Galt Hospital, Lethbridge, where the Doctor worked on him for several hours sewing up wounds in his scalp, and caring for his leg. At present he is reported as holding his own, but his condition is not very good, and none but members of the family have been permitted to see him.

Bill Christensen escaped with a shaking up, a few bruises and an acid burn or two, but has been around and working all the time.

Bob Salmon is in the St. Michael's Hospital, recovering from a very serious attack of pneumonia. He was taken in last Friday.

CONTROLLING ROUND WORM IN HOGS

The intestinal round worm in hogs is an important economic parasite that adds greatly to the cost of pork production on many farms. Possibly 95 per cent of the hogs raised are infested and the parasite is all the more serious because, like the thief that comes in the night, it lurks unseen and often unsuspected in the body of the hog where it saps the animal's vitality and reduces the hog's capacity to make gains far more than is generally realized. Worms have been a problem in the swine herd at this Station during past years and while the worms have not yet been completely eradicated means of control are used here that very largely eliminate their harmful effects.

These control measures are simple enough but to understand their application some knowledge of the life history of the worm is essential. Beginning with the full grown worm, its home is in the intestine of the hog where the female lays her eggs. A heavily infested hog may carry 50 worms and more and each worm, it is said, may produce as many as 80 millions of eggs, which are all passed out in the feces to infest the hog lot or farrowing pen. Large numbers of these eggs which are too small to be seen without a microscope, are picked up by other pigs and enter the intestine where the eggs hatch providing they have been exposed to the climate for more than two weeks. Eggs exposed for less than two weeks do no harm even if picked up, because they will not hatch. The eggs are practically indestructible, and under ordinary climatic conditions will live in the soil over a year.

In the intestine the eggs hatch and from here the partly developed worms work their way into the blood stream and travel to the lungs, liver and spleen. The first and most damage is done in the lungs. Thrumps and mechanical pneumonia are frequent symptoms and in very heavy infestation death may result. Pigs that survive are stunted

in growth even though this is not so apparent and is often not suspected in lighter infestations.

From the lungs the young worms migrate into the gullet from where they are coughed up and, as the pig does not spit, most of the worms are swallowed and returned to the intestine to complete their life cycle.

In controlling the worm the main purpose must be to prevent infestation of the young pigs and at this Station the first step taken to achieve this is to clean the farrowing pen before being used by washing with hot water and lye while the sow is washed with warm soapy water before going into the pen for farrowing.

The next important step is that within two weeks after farrowing the sow and her litter are either removed to an outdoor pen or pasture on ground where hogs have not been kept the previous year, or else the pigs and sow are moved to another cleaned pen in the piggery. The pigs may ingest some eggs dropped by the sow during this two weeks but as already explained these eggs are not harmful unless exposed for more than two weeks.

Spring litters are kept on alfalfa pasture land that is free for hogs only every other year. Fall litters are kept in clean runs in the piggery until the pigs reach about 100 pounds. Worm infestation after this time, while not desirable, is not as serious as during the early life of the pig.

Vermifuges are used very little at this station and mainly for removing worms from any breeding stock that may be badly infested. Deworming young pigs is of little or no value because the worms do most damage when in the lungs and there they can not be destroyed. Rather the means of control used are to prevent infestations of the young pigs by using clean farrowing pens and pasturing land with hogs only every other year and keeping the pigs from picking up eggs that have been exposed for more than two weeks is another important factor of control.

Raymond District Wins at Festival

News Notes

Ammon Mercer of Magrath was in Raymond Monday of this week.

Nevr Nox Gas is gaining new friends every day. Try it and be convinced. D. A. Watson, B. A. Agent.

Clifford Scoville who has been seriously ill for some time was around town this week again, but still very weak.

You will make our business better and our road easier, by patronizing the firms and the products advertised in the pages of this paper. Thank you.

A great many people were holidaying Victoria Day at various points in the district. The day was hot and still and an ideal day for celebrations.

Another week and no ruin. The cool nights have been the salvation of the crops and dry land gardens, which certainly need a good soaking rain in the very near future.

Mr and Mrs. C. D. Compton were Lethbridge visitors Wednesday evening and attended the Vocal contest in the Musical Festival, which they declared were exceptionally good and well worth the trip over there.

A new lattice work and an orchestra stand has been added to the Second Ward Open Air Pavilion, which not only adds to its appearance, but will make it more pleasant for the many patrons of this popular floor.

We are in receipt of an official Road Map of the Province of Alberta, containing a great deal of information on the Parks, and fisheries and resort of the Province. It is issued by the Publicity Bureau at Edmonton and is very interesting.

Ellwyn Tollesrup and Lamont Carter made a business trip to DelBonita, Milk River and home on Ellwyn's Indian, that they didn't think would reach Magrath. Lamont rode a plow seat on the rear of the driver's seat, and still enjoys standing on it better than any other.

U. F. W. A. Meeting

The U.F.W.A. meeting last week was held in the Canadian Utilities Store, by the courtesy of the Manager, R. W. Tollesrup, where Mrs. M. T. King gave a demonstration of Angel Cake making, and also gave the recipe, and a number of valuable hints of procedure.

Mrs. R. Farnett gave a report on Doctor and Hospital contracts, and a lively discussion followed this report.

Mrs. Blanche Scoville sang "Longing," and Community singing was enjoyed by all the members.

"A Prayer for all Mothers," by Lloyd C. Douglas, was read by Mrs. Verona Nalder.

Mrs. M. R. Woolf was in charge of the meeting.

CARD OF THANKS

We sincerely thank all those who came to our assistance with help and sympathy in our recent bereavement. Especially are we grateful to Bishop and Mrs. J. H. Walker, Mr. and Mrs. Don Rodeback, Mrs. T. O. King, Mrs. Dearden and the many others who gave material aid or sent flowers.

Mr. and Mrs. Steve Tely and relatives.

Raymond and district may well be proud of its showings in the Musical Festival held the first part of the week in Lethbridge. Raymond's School Chorus won first place in the Chorus for Towns, and brought home the cup donated by the Southern Alberta's Teachers Association, for the second consecutive year. M. C. Vance and Miss Velma Nalder coached this chorus. Magrath School came second just one point behind Raymond, and Cardston was third in this class, so that Southern Alberta was exceptionally well to the fore.

Margaret Wing won first place in the Grade 1 & 2 Elocutions in a field of 59 contestants, and Allan Crummer tied for fourth place in the Grade 5 and 6 Elocutions.

The O. K. School took first in the Rural School Chorus, and won a placement in the Action Song for the lower grades.

We congratulate these schools and individuals in the winnings.

We congratulate the O. K. School on their winning first place for the Rural School Chorus in the Festival in Lethbridge Tuesday morning.

T. Geo. Wood is leaving this week-end to attend the Rotary Convention in Winnipeg on Monday and Tuesday. "Governor Bill Emerson" is presenting the local Club Outpost with a gavel and T. Geo. our President will be there to receive it for us. His wife accompanied him and they will be away about a week.

A large number of Raymond cars were in Lethbridge this day with school children taking part in the Festival there. A complete list of our winnings will be published elsewhere in this issue.

Meagre reports reached town today that Jack Adams, who is running a maintenance out of Cardston, was injured on the Cardston-Waterton Park road on Thursday night. His wife and Mrs. Winnie Strong went to Lethbridge to see him. The car went off the grade and rolled over several times, making a practical wreck of the car, and Tony Mosiur, who was in the car with Jack, was very bad and seriously injured.

"LAST ROUND-UP" FEAT- URES FAMOUS SONG AND THRILLING ACTION OF ROMANTIC OLD WEST

"The Last Round-Up" comes to the Capitol Theatre in song and picture tonight.

The nation's favorite time is introduced in motion pictures for the first time in the Paramount production of Zane Grey's "The Last Round-Up" based on the Zane Grey novel, "The Border Legion."

From opening sequence to the thrilling climax, "The Last Round-Up" lead a capacity audience through sixty minutes of sifting moving adventure, love, daring and battle.

It brings Randolph Scott to the screen in his best performance as an outdoor hero in portrayed the role of Jim Cleve, the strong son of the West, who, thru circumstances over which he has no control, finds himself a member of the marauding, gold-stealing and cattle-rustling Border Legion.

Barbara Fritchie, Paramount's newest feminine discovery, is introduced in a leading role as Joan Randall.

Monte Blue, hero of many hard-riding dramas, returns to pictures as Kells, two-fisted, straight-shooting, rogue-captain of the Legion.

ADVERTISING TRULY DOES BRING RESULTS

For over twenty-five years The Recorder has been carrying advertisements of nationally-known goods and not one of the scores of firms using this newspaper would do so if it didn't pay them. Naturally, then, the question arises: "How do they make it pay?"

First of all, these well-known newspaper advertisers have confidence in themselves, their merchandise, and the quality of the service which they offer to their customers. Secondly they are unafraid, undismayed and unswayed in their purpose by any no business, etc. They know and all clamor about hard times, that the law of supply and demand, and the law of averages have not gone out of existence. They know that every sunrise means that a certain percentage of people are going to buy the things during that day for the purpose of living, eating, heating, cooling, wearing, reading, sleeping, cooking, building, repairing, entertaining, going places, and so forth—and they propose to get their share of trading.

They know it to be an undisputed fact that more people see and read and heed the newspapers than any other form of printed matter. They know that the newspaper is regarded as a living informational necessity and convenience in more homes than other product of press, type and paper.

They know from experience—from good old dollars and cents records—that good advertising, placed in a medium that is bought and paid for, received and read, is always going to pay. They know this because they have made newspaper ad-

vertising pay. But they don't run just an advertisement or two and then quit. They plan for at least one year in advance, and carry out a definite advertising program. The Recorder stands ready at all times to assist any merchant with the planning of his advertising matter, and to use stereos for the purpose of the better "putting over" his message to the public.

MAN'S PERFECTION AND GOD'S PERFECTION

"That rose on your lapel looks as perfect as though it were artificial," a lady remarked to a gentleman who had been decorated at a special function.

That seems to be putting a premium on the artificial. Is an imitation, then, superior to the original?

"Not an imitation," man responds. "I seek to idealize the rose. I leave out the defects of the rose that grows in the garden. What I make is an image of what I think a rose ought to look like."

What an oddly shaped stone this is," the stranger said. "I wonder who made it that way. I'll fashion one that is symmetrical?"

But the master builder smiled at the product of the stranger. "You thought only of the stone," he answered; "but I am building a great arch, and the oddly shaped stone is just the fit for that."

Many things of life appear to be imperfect, because we cannot understand God's great plans. If we were to make a world, we would not have cripples and invalids. Our human beings would be perfect as Phician statues. But they would be unreal. They would lack the fine incompleteness that looks beyond this life for completion. We would try to make a world complete here and now, and that is not true to being. God's world needs eternities to be completed. Without that hope for a development into heavenly perfection we are but children of the earth.

How happy the cripple will be when he finds out that he was not handicapped in vain but for

Yours A SKIN THAT CAPTIVATES MEN?

Just for curiosity's sake, try a close-up of your complexion. Are you surprised at what you see?

Is there a tendency towards dullness? A line or wrinkle here and there? A suggestion of dryness—even *acne*?

Don't dodge these questions! It's important that you know the truth, if you expect your skin to be attractive to others.

Begin at once to correct these complexion flaws. OUTDOOR GIRL Olive Oil Face Powder will help you. This luxurious powder feeds into dry tissues the delicate, swiftly-absorbed oils which your skin needs to remain soft, smooth and supple. With just a few applications, you can see your complexion awaken to new youth and loveliness.

You cannot buy a better powder than OUTDOOR GIRL at any price. The Good Housekeeping "Seal of Approval" is your guarantee of quality.

OUTDOOR GIRL Face Powder and other Olive Oil Beauty Products are sold by leading drug, department and chain stores in 5 sizes—15c, 25c and \$1.00. If you want to sample five of the most popular OUTDOOR GIRL preparations, mail the coupon below.

What About Social Credit in Canada?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams, (W.) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J.). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

By following this series to the conclusion the reader will clearly understand the problem which faces Canada.

No. 15

W. "But there is another method which could be used. The registered merchants might be allowed to sell at the first price right at the counter so that you would pay 75c. for a regular \$1 article. In this case you as a consumer have received your discount and it remains for the retailer to be reimbursed this amount. He would turn in his proof of sale to his bank and he would receive credit in his account for the amount of the price discount."

J. "Which way do you prefer?"

W. "It doesn't matter. Either way would achieve the desired result, that is, to increase the purchasing power of the consumer. For observe, although in the second instance the store keeper gets the credit, it is the consumer credit, for the storekeeper has already given the consumer a discount, and the amount is credited to him so that he does not suffer a loss."

J. "Well, now, the price fixing - - - ?"

W. "Excuse me, do not call it price fixing. This is something quite different. Price fixing is an attempt, generally by governments, to maintain a certain, perhaps artificial price on some commodities. By doing this the efficient industry is penalized by having the inefficient industry placed on the same level. So, over, the money used to subsidize the operation of the inefficient industry is obtained from the community by taxation or borrowing, which means increased taxation in the future in order to repay the loan. The Douglas idea of a scientific price regulation is quite different. The efficient business would still retain its advantage. Healthy competition would not be destroyed."

J. "Say, what about firms which did not register? What would happen to them?"

W. "I am afraid they would suffer a sad fate for with the National Dividend being distributed they would not be able to exploit their workers and so they would not be able to reduce their costs by cutting wages. If they could not reduce their costs to a level which would enable them to sell at the first price they would eventually go out of business."

But don't think many would refuse. As a business man, however, what would your answer be if you were offered the chance to sell your output at a discount of 25% from a price which gave

you a reasonable profit, provided that you kept your accounts in a certain way, and made accurate records and gave bills of all sales?"

J. "Boy! I'd jump at the chance!"

W. "And so would every other sane business man! The proposal guarantees the seller his costs and a profit on turnover and in addition to this it ensures the possible disposal of all goods produced, if they are desired, for it makes sure that the consumer has sufficient money to buy the entire output of industry."

J. "And all this comes from using the credit of the country for the benefit of the whole country, by the production of goods for use and not primarily for the financial result?"

W. "You're fast becoming a Social Creditor, Jones."

J. "I'm one already if it means the end of this continual struggle for markets, worries over debts and interest charges and the other things that make a producer's life miserable!"

But, tell me, how did you get that figure of a discount of 25%? How do you know it will be that much?"

W. "For the first period - say three months or six months - this is just a tentative figure. It is likely to be considerably higher when the exact records are available for the use of the National Credit Authority in computing the figure. Major Douglas has said that it could safely be set at a much higher figure, and effective discount for the first 25% would be a satisfactory first period."

Once the actual figure is available it will not be difficult to estimate the figure accurately and for the second period it might easily be 40%, that is to say, the consumer would pay only sixty cents for a regular dollar article."

J. "That sounds like a perpetual bargain sale."

W. "Do you think business could be stimulated? Do you think that orders would flow in as people began buying?"

J. "Of course they would - those who had any money!"

W. "Ah, yes. Those who had any money. That is the reason we must turn our attention to a moment to the other part of the Douglas plan - the National Dividend. I guess you can see that there would be really no need for a National Dividend if everyone were working and could find a place in the production system but it is a recognized

Alberta Crop Report No. 3 1934

ISSUED BY ALBERTA DEPARTMENT OF AGRICULTURE
EDMONTON, MAY 19,

Early wheat in Alberta is showing well above ground and has reached the stooling stage. Germination has been normal in the greater part of the province with a few patchy districts on account of dryness. Seeding of coarse grains is approaching completion, with some increase in acreage.

The weather for the most part since last report has been very warm and dry, with high winds prevailing over a large part of the province. Soil drifting has occurred in some areas, but generally speaking the damage from this cause has not been great. The central districts of the province have experienced an unusual amount of wind this spring. The warm dry period was broken by showery weather over a large section of the province during the latter part of this week, bringing many districts welcome moisture which, though not great in any one area, halted drifting and gave added impetus to the new crop. A number of districts are still urgently in need of moisture.

The warm spell of the past week has brought the grasshopper situation to a head very rapidly in the various threatened areas, and the menace to the young crop growth is serious. The hoppers have hatched out two or three weeks earlier than last year and somewhat ahead of the crop and extensive damage is likely to be done by the pest in the next few weeks from which the crop could not recover except through the medium of good rains and then only to a partial extent. The department therefore emphasizes the urgent necessity of poisoning operations. Ample supplies of bait are on hand at present at the various mixing stations and the field organization is active in meeting demand for bait.

Precipitation since last report has varied from light to heavy showers in various areas. Lethbridge district north to Vulcan reports light showers at one or two points. In the Calgary locality there has been little or no rain but north and east there have been showers - some light and some heavy. Hoppers have been reported at a number of points throughout the eastern section of the province. In the Deer and Lacombe districts, where dry conditions prevailed, fairly substantial rain, and some good showers are reported from north, northeast and northwest of the capital.

Sheep men have reported an excellent lambing season. Prices for lambs at present are very good, and hog prices or maintaining a fairly satisfactory level.

It is a recognized fact that in all industrialized countries there are thousands who will never find a job again, owing to the rapid replacement of man labor by machine work.

J. "Of course, there would be a lot of men taken back into industry by the greatly increased business that would result from the rapid depletion of existing retail stocks."

W. "Yes, but once industry were given a free hand, mechanical improvements would continue, so you will have to make some provision for the permanently unemployed."

Copyright 1934, The Douglas League of Canada.

Communications concerning this series should be addressed to the Secretary, Douglas Credit League of Canada, Box 782 Station "F" Toronto, Ont. Return postage must be enclosed if a reply is desired.

el also. There is a good market for horses, and farmers and ranchers having animals for sale have recently shipped numbers of them from the province.

The following reports have been received by the department:

Medicine Hat - Wheat germinated well in most places, but hot weather has done some damage, also soil drifting. Farmers awaiting more rain to complete seeding coarse grains.

Empress - Early crop showing nice stand, but winds have done some damage. Good rain needed. Grasshoppers not serious menace as yet.

Lethbridge - Early seeded crops showing progress, later seeding shows uneven germination due to drought. Precipitation varied throughout district. Hoppers hatching - bait now being used to capacity. Rains needed. Hoppers hatching rapidly. Live stock good condition. Lamb crop excellent.

Glenwood-Cardston - Wheat all in, early crop stooling, fall wheat in shot blade. Irrigation being used to capacity. Rains needed. Hoppers hatching rapidly. Live stock good condition. Lamb crop excellent.

Pincher Creek - Crops making good progress showing healthy color. Little damage from winds. Grasshoppers hatching, control campaign in full swing. More rain needed, but pastures are good. Small rain May 11th.

Vulcan - Progress of crops fairly satisfactory. No damage by winds. Precipitation last week 1.6 of an inch. Hoppers numerous.

Brooks - Dryest spring on record here. Some crops not germinating, will need irrigation. No damage from high winds. Rains needed for crops and range.

Rockyford - Germination of wheat very even. High winds did some damage, but crop recovering. Good moisture conditions but rain welcome.

Youngstown - Crops making slow progress. Windy weather did some damage. No rain since last report. Hoppers hatching rapidly.

Ilana - Grain making fair growth. Grass slow. Some damage from soil drifting. Very little rain.

Sedgewick - Early wheat up four inches. Germination wheat and oats good. Pasture doing well. Wind damage not serious. Light showers in district.

Olds - Crops making fair progress germination rather uneven very little rain.

Lacombe - Seeding complete. Warm weather has forced cereal growth. Some damage by soil drifting. Rain was badly needed till showers on 17th which will aid recovery.

Edmonton - Good rains in past week, crops making healthy growth, and well advanced. High winds did no serious damage.

Lloydminster - Germination of crop uniform, much wheat above ground. No damage from high winds. Very little rain, but soil moisture still good.

St. Paul - Wheat nearly all seeded. High winds prevalent, but no damage. Rain would be welcome.

Athabasca - Crops doing well, seeding practically complete. High winds did no damage. Some light rains, more would be welcome.

Peace River and Grande Prairie - Seeding practically complete. Moisture conditions good. No damage from winds. Seeding of coarse grains well advanced.

LIFE

(By Dorothy Hilliard)
A baby child - O wondrous thing!

With tiny little hands
And tiny feet and tiny curls
In glinting golden strands.

Three years have passed, the little one

Now laughs with childish gleam
As butterflies dance in the sun
And birds sing blissfully.

More years have passed and school begins

A child goes through the door
A mother sighs, for well she knows,

Her Babe can be no more.

What have we here A Grown-up!

Full eighteen years of age
Who looks ahead into the void

A tiny bit afraid.

And life goes on - a silver cord
Filled to the brim with years.

Each one a living memory
Of interspersed with tears.

ALL-BRAN RELIEVED HIS CONSTIPATION

Delicious Cereal Brought New
Health to Mr. Bartholomew

"I had considerable trouble with my stomach. Digestion was out of the question. I got medicine which gave me only temporary relief."

"Then I thought of taking ALL-BRAN. I started eating a cereal dish two or three times a day."

"It has been over a year now since I ate the first dish of bran, but from that day to this I have had the pleasure of enjoying the proper functioning of the digestive organs."

"Thanks to ALL-BRAN, I still eat it regularly and like it better all the time." - Lester Bartholomew (address furnished upon request).

Constipation is usually due to lack of "bulk" to exercise the intestines, and vitamin B to promote elimination. ALL-BRAN supplies both, as well as iron for the blood.

"The bulk" in ALL-BRAN is much like that of leafy vegetables. Certainly this food is more natural than taking harmful patent medicines. Two tablespoons daily will usually overcome most types of constipation. With each meal in chronic cases. If not relieved this way, see your doctor.

Get the red-and-green package at your grocer's. Made by Kellogg in London, Ontario.

WHO SHOULD BE TAXED?

The Clinton News-Record hits the nail on the head when it advocates the taxing of the man who lets his property go to wreck rather than the man who keeps his property in good condition. As it is at present, the man who employs the painter and carpenter to make his place more attractive, and who thus improves the appearance of the whole neighborhood, is penalized by increased taxation while the man who allows his property to become an eyesore, and thus decreases the value of his neighbors' property is encouraged in his neglect by reduced taxation. Some day the people will

wake up and demand a radical change in the assessment law and Revision Courts, as has been the case in Whitby on several occasions, will absolutely refuse to help a man who lets his property down.—Whitby Gazette

C. W. Lamb left for Courtis Tuesday morning where he has carpenter work which will keep him busy for about a month's time.

Mother's Day and Aaronic Priesthood exercises were held in both Sunday School and Sacrament meetings. Due to Conference, the Mother's day programs had to be postponed for a week.

News Notes

H. A. Jones was a Lethbridge visitor on Thursday last.

FOR SALE CHEAP— 6 doz. Fruit Bottles, 1 and 2 quarts, mostly Wide Mouth Kerrs, China Cabinet and small Kitchen Range See Grant M. Broadhead, at the Grant Card house.

Stanley Hutchison is in Brandon, Manitoba visiting with relatives and friends. He may go to work there, where prospects are pretty good.

\$750,000 will be expended on highway projects in Alberta this year according to present plans. The decision of where the money will be spent and what projects will be worked on has not been made definite as yet.

The professor, returning home late, thought he had someone under the bed.
"Who's there?" he called out.
"No one," replied the burglar.
"Fump!" said the professor.
"I could have sworn I heard someone. Good-night!"

Raymond lost to New Dayton Thursday in the League Opener by a 6-0 score. "Dick" O'Brien pitched the game for Raymond and got along fine except for one bad inning when New Dayton scored 4 runs. The first league game here will be Wednesday next with the Stirling nine, and a practice game will be played Monday night with the Magrath team.

The Annual Picnic at Wheop, up staged by the Canadian sugar factories employees, and their families and friends and others was held Thursday under ideal weather conditions, etc. Nearly 200 people were there, and the day was spent in swimming, games, races and feasting. Everyone reports a wonderful time.

Over 350 minors in Michel Natal went out on strike Wednesday because of the refusal of officials to recognize the newly formed local of the Mine Union. The mine approaches were picketed on Wednesday and it was reported that Pass mine workers were prepared to go to assist in maintaining a strong picket line in the affected area if necessary. This is to prevent strike-breakers from getting in and going to work.

D. A. Watson says, "Autolene is one of the best oils on the market for your crankcase." Try it and see.

Quite a number of Raymond people were at the Temple on Tuesday for the Stako and Ward Genealogical members' Excursion. The day was ideal and a splendid time is reported by all.

Dick Wayling was here over the week-end winding up affairs and preparing to take his children to Creston B. C. where Dick has work, and his wife is also busy. We wish them success in their new home.

**DID YOU EVER
STOP TO THINK?**
By Edson R. Waite,

WM. SOUTHERN, JR., EDITOR OF THE INDEPENDENCE (MO.) EXAMINER, SAYS:

"Newspapers are not only the best medium of advertising and pay the largest and promptest returns for the money expended, but are entitled to the support of the citizens of the community because of the actual value of a newspaper to the community. By newspapers I mean just that I do not mean handbills or circulars scattered free where they are not wanted and where they have not been invited. The Missouri statute defines a newspaper as a publication issued at regular and stated intervals, entitled to second class rates in the Federal post office with a bona fide list of voluntary subscribers who have paid or agreed to pay a stated sum for subscription service.

"While there are few, if any, who will deny that a well conducted newspaper is a valuable asset for any community, yet there are few again who realize that the work of the local newspaper is eighty-five per cent defensive and therefore eighty-five per cent greater than the benefits which are obvious. This is also true of the local Chambers of Commerce. Eighty-five per cent of the value of a live Chamber of Commerce lies in the prevention and protective measures. There is never a day when the Chamber of Commerce officials are not called on to protect the citizens and business men from wild-cat schemes, from high-binders who would exploit the citizens, from fake schemes, labeled advertising, from sideshows and all kinds of racket which would soon take any city not prepared to resist. In this work the newspaper is continually engaged. It not only backs up the Chamber of Commerce, but more often brings to public attention and action knowledge of threats to the public and private pocketbook. The newspaper helps the police maintain order and the courts and all civic machinery created for the public benefit and protection is strengthened by the local newspaper. These efforts and accomplishments are what I call defensive accomplishments and are often worth more than actual fights which the public see, and understands. It is a lot easier to prevent than it is to cure. One of the difficulties our courts face is the fact that a criminal must have accomplished his crime before he can be locked up even if he is a known criminal.

"THE NEWSPAPER NOT ONLY GIVES THE ADVERTISER A DOLLAR'S WORTH OF ACTUAL RETURN VALUE FOR THE MONEY EXPENDED ITS FUNCTIONS AS A NEWS FOR ADVERTISING. BUT BY PAPER MAKES POSSIBLE THE PEACEFUL AND PROFITABLE OPERATION OF EVERY BUSINESS IN THE COMMUNITY."

A Human Tendency

Too few business firms employ advertising to lessen their costs of selling.

Business enterprise today has two major problems: 1. To increase sales; 2. To lessen the cost of selling. Yet so many omit the use of advertising, despite their readiness to agree to the proposition that "advertising lessens the cost of selling."

We're frankly amazed at the avoidance of advertising in the face of the knowledge that it costs less to sell with the assistance of advertising than without it.

Strange, strange --- this human tendency to go contrary to what knowledge and experience has taught us is right!

To lessen your cost of selling, we commend to you an adequate campaign of regular advertising in . . .
